

SUGGESTED BIG GAME HUNTING GEAR LIST

Weather here in northwest Montana during November can be mild or cold and snowy. Generally speaking it's best to layer well and plan to have several options for clothing each day. Regardless, good quality gear sure makes a hunt more comfortable. Be especially prepared with a good, quiet jacket and pair of pants, and separate totally waterproof set of raingear. Everything else is pretty standard.

- Firearms: 270, 280, 7mm, 30-06, 300 are all perfectly good calibers.
- Two pairs of boots. Air bob soles recommended.
- Plenty of socks of variable weight.
- Poly-pro underwear or any high quality moisture wicking product i.e. Under Armour, Cabelas etc.
- Good quality camo patterned hunting pants and jacket i.e. polar fleece, Cabelas items, etc.
- Warm hat and several pairs of gloves (light pair to shoot in).
- Day pack, GPS, water bottles, camera, knife, compass and binoculars.
- Rain gear and gun oil.
- Orange vest that is quiet *(required by law).
- Compact flashlight with extra batteries and or headlamp.
- Mole skin for blisters. This item is very important.
- Hand warmers for stand hunting.
- Buck grunt, rattle bag.
